Dear FEC:

I am writing to advise that I am attempting to correct the discrepancy which occurred between our last two reports ending and starting balances. It is a software problem and we have retained a person from NGP Software to help in correcting this error. Your agency wrote, directing that there be an explanation by August 22, 2005, and I am still trying to get the computer person and the NGP software person to sort this problem out. I will assure y ou that there have been no additions to this old campaign account for several years and that the only deductions which are being made from it are the monthly bank fee for maintaining the account.

I believe our reports are otherwise up to date, except for this discrepancy, which was an error in how the software was utilized.. We are attempting to work out an agreement on outstanding fines so we can close the committee, and we are really trying to get the reports filed timely and correctly until it can be closed. There is no activity whatsoever in the committee, neither receipts or disbursements.

I would appreciate it if you would record that we are attempting to make all necessary corrections. Thank you.

Sincerely,

Margaret L. Workman
