In response to the Request for Additional Information dated May 11, 2012, the Committee responds that the requested change in data entry for this report, and subsequent reports, is extremely time consuming and could not reasonably be completed within the response date listed on the RFAI. The Committee is continuing the process of making the changes as directed by our RAD analyst in our earlier discussion on this matter, and pursuant to that guidance is adapting its procedures going forward to comply with RAD's guidance on how such activity should occur.
