CRYPTOCURRENCY ALLIANCE

CRYPTOCURRENCY ALLIANCE SUPER PAC

About The Cryptocurrency Alliance Super PAC

Cryptocurrency Alliance

The Cryptocurrency Alliance is an independent expenditure-only committee (Super PAC), founded by cryptocurrency investor and blockchain advocate Casey Bottecchio.

The Cryptocurrency Alliance Super PAC was created to raise awareness about cryptocurrencies and blockchain technology, counter the relentless propaganda espoused by the global banking elite who are threatened by a decentralized currency, and to oppose legislation and political candidates who intend to regulate cryptocurrencies at the expense of consumer privacy.

Section 1

CRYPTOCURRENCY ALLIANCE

Cryptocurrency Alliance Strategy

Political Advocacy

Cryptocurrencies threaten the existing financial system, which has resulted in an extensive lobbying campaign by financial institutions trying to maintain control of the global banking system. We aim to inform voters of the facts behind cryptocurrency.

Countering Propaganda

There are many politicians and public figures who have little understanding of cryptocurrencies (or feel threatened by their existence), resting in a stream of political propaganda we hope to counter.

Education

Cryptocurrencies and Blockchain Technology are poorly understood by the general public. One of our goals is to provide resources and information to help voters understand these concepts.

“Bitcoin and the underlying blockchain technology promote an uncensored network where all can participate with equal access”

Casey Botticello
President,
Cryptocurrency Alliance

What is Cryptocurrency and Blockchain Technology?

Topics Covered:

- What is cryptocurrency?
- What is the blockchain?
- What are the layers of the blockchain?

Section 2

CRYPTOCURRENCY ALLIANCE

NOTICE: THIS IS A CONFIDENTIAL DOCUMENT

What is Cryptocurrency?

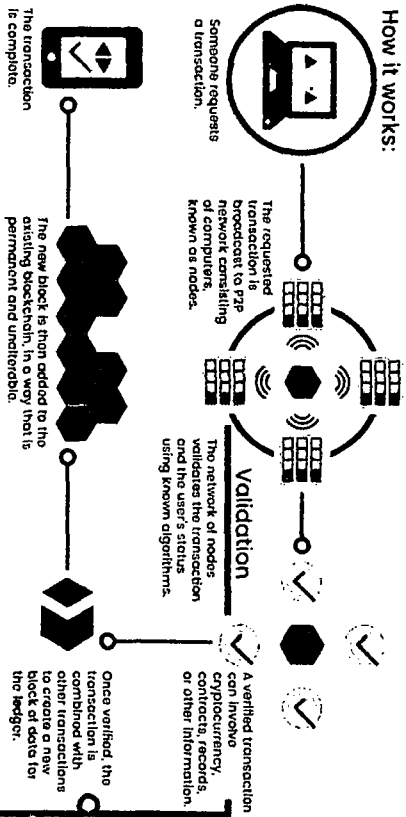

Cryptocurrency is a
medium of exchange
created and stored
electronically in the
blockchain, using
encryption techniques to
control the creation of
monetary units and verify
the transfer of funds.

CRYPTOCURRENCY ALLIANCE

How Cryptocurrency Works

How it works:

Cryptocurrency is a medium of exchange, created and stored electronically in the digital form using encryption techniques to control the creation of monetary units and to verify the transfer of funds. Bitcoin is the best known example.

- Has no intrinsic value in that it is not redeemable for another commodity, such as gold.
- Has no physical form and exists only in the network.
- Its supply is not determined by a central bank and the network is completely decentralized.

What is Blockchain?

Blockchain is a distributed ledger of peer to peer transactions that allows for secure record storage. Blockchain forms the technical backbone for cryptocurrencies such as Bitcoin but also has broad applications as a ledger of various records and contracts.

CRYPTOCURRENCY ALLIANCE

Key Features of Blockchain Technology

Propagation

There are many copies of a blockchain ledger, and no 'master' copy. All participants have access to a full copy of the ledger and all copies are identical and equivalent. No one party has control of the ledger. New transactions can be posted quickly and will propagate to all participants' copies

Programmability

Some blockchains allow for program code to be stored on them, as well as ledger entries – creating automatic journal entries that execute automatically when triggered. These are the so-called "smart contracts."

Permanence

With each user having their own copy of the ledger, truth is determined by consensus. Past transactions cannot be edited without the consent of the majority, meaning that blockchain records are permanent. The entire ledger is stored by each participant and can be inspected and verified.

Blockchain and Distributed Ledger Technology

Previous

 **Content**
What kind of transactions do we accept?

 **Contract**
How can we animate the transaction history so that events trigger predetermined actions?

 **Communications**
How are transactions created and propagated inside and between organizations?

 **Consensus**
How do we maintain the integrity of the transaction history across organizations?
