Re: Amended July 2014 Quarterly Report (04/01/2014 - 06/30/2014), Received 11/05/2014

This letter responds to your request for additional information dated March 8, 2015, regarding Gridiron-PAC's ("Committee") amended July 2014 Quarterly Report, filed November 5, 2014.

Your letter requests information related to an increase in receipts on the Committee's amended July 2014 Quarterly Report. The increased receipts total was due to two separate inadvertent errors.

First, \$20,250 of this increase was due to an inadvertent staff error when entering information into the FECFile software system about nine contributions from married couples. In each a case, the identifying information for each spousal donor, the date and amount of the contribution was entered and included accurately on the original July 2014 Quarterly Report filed with the FEC. The error occurred because the data was entering in a way that caused the software to treat the contributions as memo entries, and consequently they were not included when the software tabulated the total contributions for the period. The amendment to that report simply removed the memo entry designations. Thus, all of these contributions were accurately reported in the original filing, and the amendment corrected the inaccurate tabulation of those contributions.

Second, due to an inadvertent clerical error, thirteen contributions that were received during the relevant reporting period (April - June 2014) were inadvertently left off the July 2014 Report. This error was discovered during the routine preparation of the October Quarterly report and was corrected in the amended July Report that is the subject of this letter. The committee has as a consequence adjusted its internal practices, including reallocating responsibility for processing contributions to prevent this from occurring in the future.

Respectfully submitted,

Adolpho Birch III
Treasurer
