This responds to the May 8, 2013 RFAI concerning Restaurant PAC's Year-End Report. We did not receive the RFAI for some reason, and only became aware of it on July 10. We contacted the FEC on July 11 and were advised to file a response as soon as possible.

The reporting entry referenced in the May 8, 2013 RFAI reflects a correction so that the reported cash-on-hand figure corresponds to the actual cash-on-hand reflected on committee bank statements. An internal compliance audit going back over 4 years indicated that a few standard transactions had been made affecting the net cash on hand balance, and that the reported cash on hand balance needed to be corrected. Restaurant PAC's receipts and disbursements approximate \$1 million each election cycle, so the cash-on-hand correction was a relatively small amount. Still, Restaurant PAC has taken additional steps to assure that its transactions are accurately reported in the future.
