On 10/18/2012 SCI-PAC received a request for additional information relating to possible excess donations to the general elections of three Congressional candidates. After reviewing the initial filings from 2011 and early 2012 The SCI-PAC treasurer determined that numerous reports filed under the previous treasurer wrongly categorized donations for the general election in 2011. As there clearly was no general election in 2011, the FEC treated these donations as general election 2012 donation instead of primary election 2012 as they should have been reported. In response SCI-PAC has filed 20 amendments to monthly and year end reports from 2011 and 2012 to account for this mistake and to correctly reclassify these donations for the 2012 primary election. After these amendments, SCI-PAC is no longer showing any excess contributions to any candidate. There has been no intention of misrepresenting information or misleading anyone. SCI-PAC works very hard to stay in complete compliance with all FEC reporting requirements.
