

Biden for President ("Committee") recently filed a number of amendments to correct a discrepancy between its reported cash-on-hand and bank information. The amendments follow a comprehensive review of the Committee's filings, bank statements and general ledger. The discrepancy was due largely to a number of voided disbursements checks that had not been reported as such. Following the review and the filing of corrective amendments, a discrepancy of \$607.42 remains. After consultation with the Committee's FEC analyst, a one-time adjustment for this amount has been made to the 2011 July Quarterly report in order to reconcile BFP's FEC report with its bank statement.
