Dear Sir or Madam;

This note is in response to the Commission's RFAI to our committee dated May 20, 2015. In this RFAI the Commission draws to our attention that some supported federal candidate committees did not have the district information properly displayed when the disbursement was disclosed on the report. Our committee recently underwent a software update with our vendor. After the March report was filed we discovered that several links between candidates and candidate committees did not transition when our software was upgraded thus preventing the district info from being displayed at the time we filed our report. We have since corrected the problem with the help of our software vendor and filed an amendment to our March monthly report. We have also amended all subsequent reports to date to ensure all district info is present on disbursements to federal candidate committees and because one transaction had mistakenly appeared on line 29 vs. line 23 because of the linking errors. This changed our column b numbers on the March report and all subsequent reports thus requiring the amendments. Thank you for drawing this issue to our attention. We sincerely regret the error. Please do not hesitate to contact us if you require anything further.
