

The Committee filed amendments on 7/29/2011 for the 2008 July Quarterly Report and all subsequent reports.

An audit of the Committee's connected organization and the Committee revealed a discrepancy in 2008. Upon review, the Committee determined that it had reported several receipts that were not actually received. Although donors initiated contributions by credit card, the transactions were not completed. As such, the Committee should not have reported the receipts.

The Committee regrets the mistake and has implemented more frequent reconciliation between bank records and FEC reports to avoid such errors in the future.
