Re: Amended June Monthly Report

For the period of time in question, this committee had employees that were spending 25% or more of their time on FEA or other activity in connection with a federal election and employees that were spending less than 25% of their time on FEA.

Employees who were spending at least 25% of their time on FEA were paid out of 100% federal funds. 941 Taxes and any other fringe benefits paid to those employees were paid for with 100% federal funds as well.

Employees who spending less than 25% of their time on FEA were paid with the allocation of state and federal funds, and the 941 taxes and other fringe benefits paid to those employees were paid for with an allocation of state and federal funds as well.

The party monitors the activities of its employees very carefully with respect to this issue and has been consistent in paying taxes and fringe benefits with the proper funds.
