

This submission is in response to your review of the July Monthly Report (06/01/08 - 06/30/08) and previous reports filed this calender year.

Committee for a Livable Future is a small political organization with limited administrative expenses. Like many small organizations, the committee shares office space with other small committees. By agreement, Committee for a Livable Future pays its share of the office rent in the 4th quarter of each calender year. Utilities such as electricity, heat and cooling, water and sewage, trash disposal etc. are included in the rent.
