This note is regarding Amended July Monthly Report 2006

The request for information letter date March 21, 2007 itemized the following topics:

* Our Form 99 filed on 2/15/07 indicates that the additional receipts erroneously disclosed on our Amended July '06 Monthly report "were specifically received from a few select businesses ... for a Communications Director" and that "these funds were set aside and not deposited into the federal operations account... because they were not for operations."

First, the funds were received from a few select individuals who are highly regarded businessmen in the local area. We did not receive contributions from a corporation for activity in connection with a Federal election. We received contributions from businessmen.

Second, the funds were not deposited into our federal operations account (Federal Key Bank account) because the funds were not for general operations. We were recruiting for the Communications Director; however, the position had not yet been filled. Thus, we did not pay a salary for that person because they were not yet hired. There were no services provided by an employee (because that person was not hired yet) and therefore there was no amount of time spent during the month on federal election activities. We wanted to segregate the funds for the day when the person WOULD BE hired, and that would be when the salary would be paid and the 25% of the time rule would be put into effect.

The Communications Director position was filled in February 2007.
