Amendment to Amend July Quarterly Report 04/01/2002 - 06/30/2002

□

1. We have been having computer software problems which may be the cause for the incorrect totals on the Detailed Summary Pages. This should be corrected in this amendment.

□

2. Because of incorrect data entry and software problems, these individuals records were duplicated. This has been corrected.

□

3. Schedule H2 ratios for RT02 and GC02 have been corrected and listed correctly. I was told by our software company that possibly because of the new BCRA rules and FEC updates, the software may have changed ratios without our knowledge. Because of this, when the first amendment to this report was filed in March, the ratios were changed and we didn't know about it.

□

4. On Schedule H2 the name for the event 03/07/2002 JJ Dinner has been changed.

□

The original letter dated May 7, 2002 was not received in our office. I received the second letter the day after this response was due. I immediately started working on the issues and filed it as soon as possible. I spoke with our analyst and she has put my name on the attention line of all correspondence she sends here. I have reiterated to our staff that all FEC communications come directly to me, personally. This should correct any possible delays from happening in the future.
