Reference: May Monthly Report (4/1/2010-4/30/2010)

This responds to your inquiry dated July 14, 2010, regarding two potential discrepancies to the American Health Care Association PAC's May report. While the beginning cash on hand from the original April report did not match the May report, the April report was amended on June 17, 2010. As a result, the beginning cash balance on the May report does equal the ending balance of the amended April Monthly report. In addition, Calendar Year-to-Date figures on the amended April report, when added to the ""Total This Period"" figures on lines 7, 23, 31 and 32 of the May report do add up to the Column B totals for those lines.
