Many amendments to 24 hour reports were made in an attempt to ensure each 24 hour report corresponded with the correct Schedule E report. This activity was related to disbursement and dissemination dates, in an attempt to get independent expenditures to appear on the correct corresponding Schedule E report. Ultimately, there were some technical issues, including filing 24 hour reports on the FEC website instead of on FECFile, and some technical issues with FECFile that had to be resolved after calling FEC Tech Support. Now that these issues are resolved, all of the latest amended reports accurately reflect the correct information for each independent expenditure.
