

This letter is response to the request for additional information filed by the Commision on June 16, 2006, in regards to the Committee's May Monthly Report.

Schedule A supporting Line 17 of our report discloses payments from both registered and non-registered polital committees for access to an online voter file system and the sale of voter file data. The committee determined the usual and normal charge by taking three factors into account: 1. Total price for the voter file system to our committee, 2. Total amount of data being accessed, 3. Price being charged for comparable data by vendors within the state.

Schedule A supporting Line 15 of our report discloses payments from both registered and non-register political committees for rent and tennant office costs. Both have been charged the usual and normal charge. Rent is based on market price and the percentage of square foot utilized versus the cost of rent to the party. Tennant office costs are based on the amount of office supplies and utilities utilized by the tennants.
