This report has been filed today because of a software problem with the latest update of FEC File. I prepared the 2nd quarter report prior to the deadline and attempted to file it before the deadline. Unfortunately, the new version of FEC File would not work on my computer. I use a Macintosh computer running VM Ware Fusion which is a PC emulation software that allows PC programs to run on a Macintosh computer. I have been using a combination of Windows software and the PC emulation software on my MAC and it has worked for over 10 years through many updates. I consulted with FEC tech support, Microsoift Tech support and VM Ware Fusion tech support and after trying and failing with several approaches that were recommended to me by these various tech support experts we finally arrived at a combination of new software and hardware that would run the latest version of FEC File. As you can see the 2nd quarter report had no new transactions and would therefore be of minimal concern to the public interest. We believe with our new equipment and software that we will be able to utilized the latest verson of FEC File to upload our reports in the future.
