I have been trying to file the report due today and am getting the error below:

CSVwrit3://nokey4333

I was able to upload the file once, but the report changed the ending date to 01/31/2016 instead of 12/31/2015, and the file rejected. I was able to correct, but then I got an error indicating something about detecting proxies and using SSL. The report again changed the date from 12/31/2015 to 01/31/2016.

I don't know what else to do to get this report filed on time (due today). I have been trying and don't want to incur a late filing penalty. Please advise,
