Please accept the following response to the Commission's Request for Additional Information (RAI) dated June 16, 2015. The apparent math error on our April Quarterly report referenced in the RAI was caused by two receipts being reported on Line 12 rather than Line 11(c) on the Year End 2014 report. We are filing an amended Year End 2014 report to disclose the two receipts on the proper line (11(c)), which in turn corrects the math errors cited in your letter. As a result of this amendment, the election cycle-to-date numbers in Column B on the April Quarterly report are now correct and no further action is necessary at this time.
