

April Quarterly 2010:

- We corrected the Cash On Hand and the Year To Date totals on all Amendments.

October Quarterly 2010:

1) Due to an error in the software we were using, we were originally unable to place the correct election period for a number of Disbursements to candidates.

- We have corrected the error and now all the distributions have the correct election period.
- The checks were designated to the correct election period as reported on the Amendments.

2) Payment to the software vendor should not have been placed in our PAC software as a Hard Dollar expenditure.

- Money came out of the Soft Dollar account, but was accidently reported on the software.
- This amount of money was removed from the Amendment, to show the correct accounting.

All amended reports now show the actual numbers that we have in-house.
