This submission is in response to the Commission's letter of February 20, 2003 regarding the committee's post-general and year end reports.

Please note that the negative balance on the committee's reports reflects the pending disposition of voided checks and does not reflect an overdraft of committee funds.

In upcoming reports, the committee will disclose several voided checks, which represent, overpayments and payments made in error, that will bring the committee into a positive cash balance.
