

This note is prompted by a notification from the FEC highlighting errors in our 48-hour reports. During the Post-General Reporting period three separate contributions in excess of \$1,000 were not filed within the 48-hour time period. After researching these errors it has been discovered that after the reports were filed additional data entry was conducted in the same date range that did not appear on our original report. Thank you for highlighting this error. We have altered our data entry protocol to prevent this error in the future.
