I have tried to file electronically for the independent expenditures, but the file keeps getting rejected based on errors that simply could not be corrected.

After trying for almost 2 hours, I called the help line, but it was 10 minutes past their 5:30pm closing time. I got an email today that we were given until midnight tonight (October 18th, 2013) to file without any penalties because of the government shut down, and I have been trying since to meet this deadline. I do not know how to resolve the issues in time, and am hoping that I am given Monday to resolve it.

Thanks.
