

This letter is being filed to notify the Commission of a retired debt.

It was recently discovered that our Committee had been using an incorrect administrative ratio for this cycle. After correcting the ratio and amending the relevant reports for 2007 and 2008, it was discovered that the Committee had made excessive transfers from the non federal account. The Committee then reported the overage as a debt and made regular payments on said debt. Today the Committee transferred \$51,334.83 back to the non federal account, effectively retiring that debt.
