

The second issue, however, is confusing. We have researched our Mid-Year Report, and we are unable to find the Schedule H2 described in your inquiry. Our Schedule H1 appears between pages 34/99 and 35/99 of our report, and Section C of that Schedule reflects the 90/10 ratio described in the prior paragraph. The Schedule H1 is followed by several Schedules H3, and they account for the transfers between our Federal and Non-Federal PAC.

Regarding the third issue, there are no receipts among the \$58,824 reported on Line 11(a)(ii) that exceeded \$200 from any single source for the calendar year-to-date as of the time of the report. Rather, the majority of the contributions at issue derived from mailings to our donor base of more than 17,000 members. The respondents to our mailings, on average, contribute slightly over \$40 each. Please note that our report also included \$99,167 in itemized contributions on Line 11(a)(i), and demonstrates our understanding of the itemization requirement. A detailed listing of the non-itemized receipts, however, is available upon request.
