Please note that we have discovered that TargetCitizens Political Forum inadvertently received excessive contributions from a small number of people in 2011. The recently-filed year-end 2011 report identifies these contributions. This was the result of an administrative error associated with an extra payroll date in December, 2011. Refund checks will be issued to these individuals and disclosed on the February report, and Target will put in place procedures designed to avoid this error in the future.
