

Good Morning.

I am responding to notification C00151787. I had reported that several contributions made in September 2006 were primary contributions. In fact the primary elections for those campaigns had already occurred. I did not specify on the contribution checks whether they were primary, general or debt relief. I am currently checking with each campaign to see where they designated those funds. As I discussed with Andrea Needles, I was misinformed on how to report contributions to the FEC. I always reported the first \$5K of campaign contributions as primary and additional contributions up to \$5K as general. I always make sure that we do not contribute more than \$10K to any campaign in an election cycle. I will update you once I know the action that I will be taking to correct the October 2006 Monthly Report. Thank you for your guidance in this matter.
