Dear Federal Election Commission,

We are writing in response to your inquiry regarding the negative cash-on-hand balance identified during the filing of our October 2025 Quarterly Report.

Upon review, we determined that the issue originated in the amended October 2024 Quarterly Report, but was not identified until preparation and reconciliation for the October 2025 Quarterly filing.

The issue resulted from two separate but related reporting errors, both of which we have since identified and corrected.

First, when filing the amendment to the October 2024 Quarterly Report, we misunderstood the amendment process and did not realize that an amended report requires a complete re-upload of all transactions from the original filing. As a result, we submitted only the transactions that were being corrected, which unintentionally omitted previously reported contributions. This omission caused the system to reflect an inaccurate and artificially negative balance, which carried forward until discovered during the October 2025 Quarterly review.

Second, during preparation of contribution upload files, a CSV formatting issue removed leading zeros from ZIP codes that begin with zero. Contributions associated with those altered ZIP codes were not accepted by the system during upload and therefore were not included in the report. Once this issue was identified, the file was corrected to preserve leading zeros and the missing contributions have been re-entered.

Both issues have now been fully addressed. We have corrected the amended October 2024 Quarterly Report to ensure all contributions and disbursements are accurately reflected. In addition, we are conducting a thorough review of prior filings to confirm that no other reports were affected by similar CSV formatting issues.

We take our compliance obligations seriously and regret the confusion caused by these errors. We appreciate the Commission bringing this matter to our attention and are committed to ensuring accurate and complete reporting going forward.

Please feel free to reach out with any questions or let us know if any additional information or documentation would be helpful.

Sincerely,
Mike Trapp
