Figure 1 consists of 12 sub-diagrams labeled (a) through (l), arranged in two rows of six. Each diagram shows a 4x4 grid of nodes. Nodes on the top, bottom, left, and right boundaries are marked with a thick black border. Nodes in the interior (the 2x2 central area) are marked with a thin black border. The diagrams illustrate the iterative process of solving a 2D Poisson problem using the Gauss-Seidel method. (a) shows the initial state where only the boundary nodes are defined. (b) through (l) show the progression of the iterative method, with the interior nodes being updated and their values converging towards the boundary values. The diagrams are arranged in a sequence that shows the convergence of the solution.

TOTAL			\$1,294.51

MEMO ENTRY:

These loan payments (and the associated interest reflected in line 21) were made on a loan secured by and assumed by the Abraham for Senate committee (C00281998). They are reflected on the Schedule C filed with that committee's July 31 mid-year report.

The total of these payments with interest (\$1,639.44) has been transferred from Abraham for Senate back to this committee (see line 12 as itemized).

No further payments on that loan will be made by Abraham Senate 2000.
