I write regarding the response by Working America Coalition (the "Committee") to your Request For Additional Information ("RFAI") concerning the Amended 12 Day Pre-General Report filed on January 31, 2017.

The Committee prepared a further amendment to the 2016 Pre-General Report to be filed in response to the RFAI, as indicated in the first Miscellaneous Response (Form 99) filed on July 18, 2017.

However, when the Committee attempted to file the amended report, it received the following error message from the FEC:

USERERROR #61 : The amendment filed by committee C00620583 could not be processed because the report contains fewer than half of the itemized transactions contained in the original.

The Committee believes the error message has been generated in response to a change that has occurred in the Committee's reporting software between the date the Amended 12 Day Pre-General Report was filed on January 31, 2017, and today. An updated version of the reporting software has combined records that were previously reported as multiple small off-setting disbursements for an in-kind contribution into one larger disbursement. The report that the Committee is attempting to file is accurate, but the FEC system appears to disallow its filing because of the change in the number of disbursements reported from the previous iteration of the same report. The Committee will continue attempting to file the required amendment until it is accepted by the FEC's filing system.
