This Form 99 is submitted in response to the FEC's request for additional information dated September 29, 2015 and related to the committee's May Monthly Report. The FEC has requested additional information pertaining to disbursements disclosed by the committee on Schedule H4 of its May Monthly report with an assigned administrative allocation ratio of Admin 13/14. The committee has reviewed the related transactions and determined that the allocation ratio is proper because the transactions relate to services for activities that occurred in the 2013/14 election cycle for which billings were submitted/received after the conclusion of the cycle. The committee further notes that none of the subject transactions was part of any administrative transfer, and that the committee is well beyond the 60-day window in which an administrative transfer based on such transactions could be permissibly performed. Accordingly, the committee has not received an excess transfer of non-federal funds. Given the above, the committee believes its report properly discloses the administrative transactions.
