This report responds to the RFAI dated May 4, 2026. The committee in 2025 began using new software to track expenses and receipts, compile information, and draft FEC reports. The 2025 mid-year report was the first report that was prepared using this new software. The committee recently realized that information and transactions were not properly updated from the previous software to the current software. Once the error was realized, the committee filed an amendment to reflect the accurate numbers which were reflected on the filed amendment. Now that the transition to the new software has been completed, we do not expect any cause for concern in the future.
