

This note addresses amendments made to the following reports:

August Monthly 2003
February Monthly 2007
April Monthly 2007

We discovered that several interest payments we made to our line of credit with M&I Bank of Southern Wisconsin were, in fact, overpayments of the amount of interest due. The bank applied the overpayments to the principle of the line of credit.

Accordingly, these reports have been amended to correctly account for these amounts (a total of \$788.12) as debt payments against our line of credit rather than expenditures for interest on our line of credit.
